REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: allowance of claims 1-10 is indicated because while the various components of the instant invention exist in the prior art, certain components do not. Specifically, a method of assembling a car body, providing a slide base, providing a locator which removably placed on the slide base, providing a lifter for placing the locator on the slide base with the locator being placed on the lifter at the upper limit and the locator being placed on the slide base when the lifter is removed is known in the art. For example, Sekine et al. (U.S. Patent No. 5,044,541) disclose a method of assembling a car body providing at least the structure asserted above. Similarly, Alborante (U.S. Patent No. 5,902,496) teaches a welding station providing a slide base (trolley 8) and locator (gates 6, 7) on a longitudinal rail. Alborante further teaches the rail (9) having separate sections that are able to move transversely to the conveyor line. However, none of the prior art of record shows or merely suggest the claimed invention as a whole including the recitation of "the car body assembly line being provided, in a vicinity thereof, with a lifter for placing the locator on the slide base when the slide base is located at the retreated position, the lifter extending from the retreated position to the advanced position of the slide base" in the manner recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
